NEW EPOCH-MAKING GREGG BOOKS

Applied Secretarial Practice
By Rupert P. SoRelle and John Robert Gregg

A dramatized activity course organized on the plan of office manuals compiled for the instruction and guidance of stenographers and secretaries in important business organizations. List price: Text, $1.40; Laboratory Materials, 60 cents.

Business Mathematics—Principles and Practice
By R. R. Rosenberg

A pace-setting course developed in the classroom of a certified public accountant, with fifteen years of experience in the teaching and accounting field. Published in pad form in 1932 and in book form in 1934. List price: Pad form—Part I, 60 cents; Part II, 80 cents; Text form, $1.40.

Key$ and Cue$ (Business Plays)
By Bruce A. and Esther B. Findlay

A unique and successful method of teaching business ethics, business attitudes, and appreciations. A most effective and convincing way of presenting age-old truths and principles without tiresome moralizing or dull didacticism. List price: $2.00. (A charge must be made for sample copies.)

Office Appliance Exercises
By John T. A. Ely and A. C. Beaver

A minimum course in the use of office appliances adapted for use with advanced typewriting classes. Follows a simple teaching plan, based on the apprenticeship system of instruction. Only 36 assignments requiring a minimum amount of office equipment. List price: $1.60; special sample copy price, $1.00, postpaid.

CIVICS OF TODAY

A WORKBOOK FOR THE STUDY OF CHANGING COMMUNITY SERVICES AND ORGANIZATION LOCAL, STATE AND NATIONAL

By
CHARLES H. SEAVER

Shall we teach the civics of today or of yesterday?

It contains the developments since the famous March 4, 1933, carefully woven into the older fabric, so that the main functions of government as now carried on may be clearly understood.

An understanding of current life in the United States is impossible without a knowledge of present-day realities of government.

It may be used as a combination of textbook and workbook where some copies of older textbooks are available for reference.

An Enriched Science Program

Results from the Use of

Hunter and Whitman's Problems in General Science

and

Hunter's Problems in Biology

Each of these books embodies the latest approved ideas of modern science teaching. Each is built on the unit plan. Survey questions, previews, self-testing exercises, experiments in the form of demonstrations (affording an economy of time and money), problem-questions, class and individual projects, and field trips are features that make both these books unusually teachable.

Problems in General Science
688 pages
